

[DRAFT] Data Sheet E – Results of Internal Review Committee

Date of Review/Recommendation: November 30, 2010

Water Body Under Evaluation:

Water Body ID #: 1868
Name: Dry Fork Creek (Class C)
Length of Segment: 11.1 miles
County (ies): Dent

Use Attainability Analysis (UAA) Study:

UAA ID #: 1246
Submitter: MEC/ERC
Date(s) Conducted: October 3-4, 2008
Date Received: October 24, 2008
Use Evaluated: Whole Body Contact Recreation (WBCR)

UAA Criteria Evaluated:

- ☐ 1-Natural Pollutant Sources.
☒ 2-Natural, Ephemeral, Intermittent or Low-Flow Condition.
☐ 3-Non-Remedial, Human Caused Condition.
☐ 4-Hydrologic Modifications.
☐ 5-Natural Physical Features.
☐ 6-Substantial, Widespread Social and Economic Impact.

Use Determination & Recommendation:

Has the use existed since November 28, 1975? ☒ Yes ☐ No ☐ Unknown

Comments: The UAA survey was conducted in October 2008 and no WBCR observed. However, a rope swing was observed at site #5. According to the Missouri Department of Conservation website, fishing for sunfish occurs on this segment. No interviews were conducted.

Is the evaluated use attainable? ☒ Yes ☐ No

Comments: The stream met the maximum depth criterion at 3 of 7 sites and the median depth criterion at 1 of 7 sites. Multiple pools with depths greater than 1 meter were noted during the UAA survey. Because the depth criteria were met and there is evidence of existing use, the committee recommends that the WBCR use designation be retained. Due to evidence of secondary contact recreation (SCR), the committee recommends that the SCR use be assigned.

Committee Recommendation:

☐ Add Use ☒ Retain Use ☐ Remove Use
☐ Modify Use ☐ Inconclusive
